

7. Acknowledgments

The need for the rapid establishment of the UV monitoring program was identified by Dr. Peter Wilkniss, Director, Division of Polar Programs, National Science Foundation in 1987. Dr. Polly Penhale (NSF) and Dr. Sue Weiler (NSF/OPP Consultant) have guided this project.

Key Contributors

This activity was funded by subcontracts SCE-M34578-01 and SFJ-M4266401 to Biospherical Instruments Inc. from Antarctic Support Associates (ASA). ASA personnel involved include R. Koger, D.C. Shepherd, S. Kottmeier, R. Dichtl, R. Rainbow, D. Trujillo, and J. Zanetell.

We gratefully acknowledge the operators who keep our instruments running under the most adverse of conditions on Earth – without them, this project would not be possible.

South Pole operators for the period of this report include John Booth and Chris Cleavelin of ASA.

Palmer Station operators for this period include Kevin Bliss and Glenn Grant of ASA.

McMurdo operators for this period include Jeanne Kelley and Glenn Grant of ASA.

Susana Díaz of CONICET manages Ushuaia's operation. Dr. E. Olivero, the current director of CADIC, provides facilities and personnel support. Former director Dr. J. Rabassa made this installation possible.

NOAA/CMDL personnel Malcolm Gaylord and Dan Endres generously provide assistance in the operation of the Barrow system. Dale Stotts of the Ukpéagvik Inupiat Corporation (UIC), and Dr. J. Kelly and J. Sonderup of PICO aided in the original establishment of the system.

Dr. R. McPeters and Dr. J. Herman of NASA/GSFC provided TOMS Total Ozone data for comparison purposes.

We wish to express our thanks to Dr. H. Slaper for providing software for the Fraunhofer correlation method.

Special thanks go to Rudy Dichtl, Ron Rainbow, Jan Zanetell, Dave Trujillo, and Marian Moyher of ASA; all of whom have worked with us on a daily basis in making our accomplishments possible in Antarctica.

Personnel at Biospherical Instruments

The Principal Investigator for the project is C. R. ("Rocky") Booth, the Chief Executive Officer and Research Director of Biospherical Instruments Inc. The Co-Principal Investigator is Dr. Germar Bernhard, an Atmospheric Physicist and well-published UV researcher, joined us from the Fraunhofer Institute for Atmospheric and Environmental Research (IFU) of Garmisch-Partenkirchen, Germany. The Project Manager is James ("Jim") C. Ebrahimian, and is responsible for the project's operational activities. Lauriana W. Cabasug was a project Data Analyst responsible for daily analysis of data, web site development and maintenance, and data downloading. Vi Quang and Stuart Lynch are new additions to the group as Data Analysts/Database Administrators performing data analysis, database development, programming, web site development and maintenance, and data downloading. James Robertson participated in several site visits and serviced the instruments. Joan Schwenker provides important periodic support as a Technical Writer, and Web Site Author/Administrator. Lisa Armstrong provides critical project support by performing data product distribution and database maintenance in support of this activity.
